PROFESSIONAL SUMMARY

Full-stack software developer with 2+ years building production-grade systems in Go and Flutter. Shipped a mobile app to 1K+ users, automated away 60% of manual email workflows using an AI agent, and cut backend latency by ~40% with a from-scratch Go + PostgreSQL architecture.

EXPERIENCE

Junior Software Developer | [APCWO](#) · Bengaluru, India Mar 2024 – Mar 2026

- Designed and delivered the POC for a Go + Flutter + PostgreSQL migration that was greenlit for full production adoption, directly influencing the team's core tech stack decision.
- Built the complete Flutter frontend for the APCWO mobile app, integrated REST backend APIs, and assisted in the App Store & Play Store submission process, reaching 1,000+ downloads within months of launch.
- Built an AI-powered email automation agent using Google ADK for Go, eliminating the need for manual drafting across the team's most repetitive communication workflows.
- Designed relational schemas and implemented audit/logging triggers, achieving full data traceability and zero integrity violations in production.

Software Developer Intern | [APCWO](#) · Bengaluru, India Aug 2023 – Feb 2024

- Built and shipped the first version of a cross-platform mobile app in Flutter/FlutterFlow with backend API integration, published simultaneously to both the Play Store and App Store.
- Migrated a static marketing website to a Hugo + Go dynamic CMS, reducing content deployment time from days to minutes for non-technical editors.

PROJECTS

FinAI - Personal Finance Tracker ([Live-Link](#))

- Architected a full-stack personal finance tracker utilizing Go-Gin RESTful APIs and React, implementing secure JWT-based authentication with refresh token rotation, RBAC, and strict per-user data isolation.
- Built an interactive dashboard with real-time spending analytics, a category-wise spending breakdown chart, and month-over-month financial summaries derived from live transaction data.

Shepherd Pathways - Multi-Vertical Consultancy Platform (Freelance) ([Live-Link](#))

- Built a full-stack marketing and inquiry platform for a registered MSME consultancy spanning 5 service verticals — featuring a multi-step inquiry form with client-side validation, rate limiting, and sanitized Supabase integration.
- Architected a modular React SPA with dynamic routing, reusable component system, and a custom design system (Tailwind v4 theme tokens), delivering a cohesive brand identity across all pages.

TECHNICAL SKILLS

Languages: Go, JavaScript/TypeScript, Dart

Frameworks: Go-Gin, Node.js, React.js, Flutter, Tailwind CSS

Data Stores: PostgreSQL, MongoDB, Supabase

Tools & Platforms: Git/GitHub, Postman, PgAdmin, VS Code, Antigravity, Cursor, Google ADK

EDUCATION

B.E. in Information Science & Engineering

Aug 2019 – May 2023

[The Oxford College of Engineering](#) · Bengaluru

CGPA: 8.7 / 10

10th - 12th (CBSE)

Mar 2016 – Apr 2019

[Kendriya Vidyalaya A.S.C Centre](#) · Bengaluru

CGPA: 8.4 CGPA (10th) | 65% (12th)
